

Ethical Theories

Date: _____

- Why Ethical Models / Theories?
- Factors affecting our Behaviour?
- Competing factors?
- Value Judgement.
- Ethics Choices
- Making Ethical decisions
- Rights & Duties
- Personal duties.
- Ethical theories →
 - Consequentialism
 - Deontology
 - Human nature
 - Relativism
 - Hedonism
 - Emotivism

a) Consequentialism (Human actions are judged good or bad, right or wrong depending on results or outcomes) -

Three types:-

- 1) Egoism (The work which makes me more happy or gives me less damage, that seems right, 'daro ka khayaal karna')
- 2) Utilitarianism (Action which benefits maximum number of people)
- 3) Altruism (Good for all, some harm to me)

b) Deontology (Deon → duty, logos → science)

↓
Act is considered good if the individual, committing it had a good reason to do so

c) Human Nature (- Humans born with natural capabilities - Our task is to discover & develop these)

↓
Apni gudarti salahiyaton ko pehchano, unhein nikharoo, aur amal ko unhi kay mutabiq jachao.

d) Hedonism (Pleasure is highest good - act to maximize pleasure & minimize pain)

e) Emotivism (Ethics == expressing feelings, not stating truth - apt facts)

Ethical Decision Making - 4 steps process

Date: _____

• Law & Ethics

- Guidelines (formal → nazah rikhi hai policies of expected behavior, informal → briefs questions that help us quickly evaluate an action)

• Informal Guidelines

- Is there something which needs to be hidden?

1) Are there any 'shades'?

2) Does it pass any mom test.

3) Does it pass TV test

4) Does it pass Market test.

- Does your instinct tell you that sth is wrong?

1) Smell test

• Formal guidelines

1) Act violates Corporate policy

2) Act violates Corporate or Professional codes of Conduct or ethics.

3) Act violates Golden Rule?

- ↓
• Are treating others the way you would like to be treated,

• Ethical decision making - 4 steps

1) Understanding the Situation

2) Isolating major ethical dilemmas (should someone do or not do something)

3) Analyzing the ethicality of both alternatives

in Step II.

↓ Consequentialism → ~~Action in Step 2, will someone harmed~~ ~~Action in Step 2, will someone benefited~~ ~~Action in Step 2, will someone harmed~~ ~~Action in Step 2, will someone benefited~~

1) Action in Step 2, will someone harmed.

2) Action in Step 2 not done, will someone harmed.

3) Which is least harm above.

4) Action in Step 2 done, anyone benefited

5) Action in Step 2 not done, anyone benefited.

6) Which has maximum benefit, 4 or 5.
